

SAMMY KIRITU WANGAI

IT Operations Engineer | Systems Administrator | Microsoft 365 & Infrastructure Specialist

skiritu6817@gmail.com | +254 726 601 204 | LinkedIn Profile | Nairobi, Kenya

PROFILE

Senior IT Operations Engineer with 4+ years of progressive experience leading enterprise ICT infrastructure across hospitality and horticulture environments. Proven record of reducing manual workload through automation, improving endpoint compliance and security posture, and maintaining 24/7 service availability across networking, identity, and access-control systems. Skilled in Microsoft 365, Entra ID, Intune, Active Directory, Windows Server, Cisco Meraki, Fortinet, and Sophos, with hands-on leadership of IT teams and vendor partners. Growing focus on Azure and cloud infrastructure.

PROFESSIONAL EXPERIENCE

Senior IT Operations Engineer

Aug 2024 – Present

Wadi Degla Investments — Nairobi, Kenya

- Lead IT operations across multiple departments, maintaining system availability, network uptime, and cybersecurity for the organization.
- Supervise and mentor a small IT support team, assigning priorities and enforcing IT policy to sustain consistent service standards.
- Administer Active Directory, DHCP, and DNS, managing user accounts, access permissions, and infrastructure troubleshooting across the network.
- Configure and maintain a centralized Yealink IP PBX system supporting organization-wide voice communications.
- Deploy and maintain Suprema and ZKTeco biometric and access-control systems, supporting physical security for all staff and visitor access.
- Manage IT vendors and third-party providers, coordinating service requests and repairs to ensure timely resolution of technical issues.
- Coordinate with the access-control MSP responsible for turnstiles, barrier gates, bag scanners, and metal detectors, including fault reporting and service verification.
- Manage endpoint security via the Sophos Admin Console, monitoring devices and enforcing protection policies.
- Deploy and manage Windows endpoints using Microsoft Intune and SCCM, streamlining device provisioning and patch compliance.
- Automate recurring IT reporting and device-provisioning workflows, cutting manual processing time and reducing setup errors.
- Conduct preventive maintenance and IT asset tracking, improving infrastructure reliability and equipment lifecycle visibility.
- Partner with leadership on IT strategy, KPI reporting, and infrastructure investment planning.

Junior Service Delivery Analyst

Dec 2021 – Aug 2024

Flamingo Horticulture — Kenya

- Resolved end-user support tickets via ManageEngine ServiceDesk and Desktop Central, meeting service-level response and resolution targets.
- Delivered remote and onsite technical support, diagnosing hardware, software, OS, and connectivity issues across the farm.
- Deployed access points, point-to-point links, and wireless radio bridges to extend network connectivity across remote farm sites.
- Monitored infrastructure via the Cisco Meraki dashboard, improving network stability and reducing recurring connectivity faults.
- Administered Microsoft Entra ID and the Microsoft Admin Center for secure identity management and Microsoft 365 access control.
- Managed Active Directory, DHCP, and DNS, including user account and permissions administration across the organization.
- Onboarded and managed workstations via Microsoft Intune, standardizing device configuration and enrollment.
- Installed and maintained IP surveillance cameras across farm sites, strengthening security monitoring coverage.
- Administered UTime Master biometric systems for 3,000+ employees, integrating clocking data with HR and payroll for accurate attendance processing.
- Installed and troubleshot face and fingerprint biometric attendance devices, ensuring reliable daily attendance capture at scale.

- Performed SQL Server administration and data replication (SSMS), safeguarding data integrity and availability.
- Trained new users on ICT policy and security practices, reducing avoidable support tickets and improving adoption.
